

### HDFC Bank launches 1st edition of API Banking Summit on Dec 17

**Bengaluru.** HDFC Bank held the 1st edition of its API Banking Summit in Bengaluru today. In this first-of-its-kind event in the country, HDFC Bank invited partners to use its open banking API services, which enable third parties to build services that can connect to its banking systems.

With over 100+ APIs in ready-to-consume stage and the best banking security in the country, HDFC Bank offers a huge opportunity for third parties such as fintech's, aggregators, third-party service providers & platforms, direct selling agents and developers to build applications & portals using its open banking API services.

## Galaxy of Homes held a unique seminar on British Real Estate Investment for Indian Investors

**Mumbai.** Galaxy of Homes held a unique seminar on property investment for Indian investors. The seminar was hosted and carried forward by Mr. Vikash Jayaswal & Madhurita Jayaswal – Founders & Directors, Galaxy of Homes at Mumbai Cricket Association (MCA) Recreational Club (Boundary Hall). The session highlighted the ways in which an investment of Rs 80 lacs in the UK will fetch high ROI i.e. rents of around Rs 5.4 lacs per annum. Investing Rs 80 lacs in a Northern UK

property seems an easily achievable amount when compared to Rs 4Cr worth property in and around London (which gives a much

lower return), etc.

Mr. Vikash Jayaswal, Founder & Director, Galaxy Homes said, "In the seminar we discussed about how a

investor in India gets to have a British Investment Portfolio, when he/she chooses to join our unique and cost-efficient real estate model. The Company has bought, refurbished and let over 500 properties, equating to an investment of nearly Rs 400Cr in the last 4 years.

This has led to the rapid growth and socio-economic regeneration in the northern part of UK. With a team of 50+ now working across four offices in two countries including one in India we look forward to our high-flying Vision 2020".
